Main Causes of QuickBooks Error H202

- Hosting configuration issue on server computer
- Firewall or antivirus blocking QuickBooks
- Damaged .ND or .TLG files
- Incorrect QuickBooks Database Server Manager setup
- Network issues or improper folder permissions
- Outdated QuickBooks version

QuickBooks Error H202 Fix Step by Step (Easy Methods)

Step 1: Use QuickBooks Tool Hub (Recommended)

1. Download and install **QuickBooks Tool Hub** from Intuit official website.
2. Open Tool Hub and go to **Network Problems** tab.
3. Run **QuickBooks Database Server Manager**.
4. Click **Start Scan** on your company file folder.

Still seeing Error H202? Call [+1 (855) 914-5215](tel:+18559145215) for expert remote help.

Step 2: Check and Fix Hosting Settings

1. On the server computer, open QuickBooks Desktop.
2. Go to **File → Utilities**.
3. If you see “Stop Hosting Multi-User Access”, click it.
4. Then again go to **File → Utilities** and select **Host Multi-User Access**.

Step 3: Run QuickBooks as Administrator

1. Right-click on QuickBooks icon.
2. Select **Run as administrator**.
3. Try opening the company file again.

Step 4: Repair .ND and .TLG Files

1. Go to your company file folder.
2. Find files ending with .ND and .TLG.
3. Rename them by adding .OLD at the end.
4. Restart QuickBooks and open the file.

Step 5: Configure Firewall Settings

1. Open Windows Firewall settings.
2. Add exceptions for QuickBooks ports (8019, 56728, 55333-55337).
3. Allow QuickBooksDatabaseManager.exe and QBW32.exe.

If you find this technical, our team at **https://www.suresupportinc.com/** can do it for you remotely.

Call +1 (866) 384-9053 now.

Step 6: Restart QuickBooks Database Server Manager

1. Press Windows + R, type services.msc.
2. Find **QuickBooksDBXX** service.
3. Restart the service and set Startup type to **Automatic**.

Step 7: Clean Install QuickBooks (Advanced Fix)

Use the official Clean Install Tool to reinstall QuickBooks Desktop without losing data.
